

Radical Index to Li Fanwen's Tangut Dictionary

《夏漢字典》檢字索引

INTRODUCTION

This page is an electronic version of the Radical Index to Li Fanwen's Tangut Dictionary [XHZD] (pages 1088-1166) :

- Li Fanwen 李範文. *Xia-Han Zidian* 夏漢字典. Beijing : Zhongguo Shehui Kexue Chubanshe 中國社會科學出版社, 1997.

As I have been working from a photocopy of the Radical Index and the Four-Corner Index, with only occasional access to the main body of the dictionary, there are a number of issues with the index entries that I have not yet been able to check against the body of the text, so this page should be considered a work in progress.

Fonts

The following fonts must be installed on your system in order to view the Tangut characters and radicals on this page :

- [Mojikyo M202 and M203](#) fonts
- [BabelStone Tangut Radicals](#) font **Version 1.01** (a makeshift font that covers Tangut radicals, as well as some XHZD characters that are not in the Mojikyo fonts)

You will also need a good general-purpose Unicode font to display the phonetic reconstructions correctly (e.g. [Doulos SIL](#)).

INDEX OF RADICALS

Arrangement of Radicals

The table of radicals at the head of the Radical Index in XHZD is based on number of strokes (1 through 9+) and first stroke type (dot, horizontal, vertical and oblique). I have found this arrangement rather inconvenient to use for nearly 400 radicals, especially as some radicals that are based on a simpler radical form are not included in the table of radicals (e.g. Radicals 11-17). I have therefore devised a different method of ordering the radicals in the Index of Radicals below (this does not affect the arrangement of the radicals within the actual [Radical Index](#)), based on simple radical elements that are common to a group of radicals.

- [Radicals with Horizontal First Stroke](#)
- [Radicals with Vertical First Stroke](#)
- [Radicals with Oblique First Stroke](#)
- [Radicals with Dot First Stroke](#)
- [Radicals with Horizontal-Bend First Stroke](#)
- [Radicals with Oblique-Bend First Stroke](#)

The Index of Radicals includes all glyph shapes that could be considered as a radical, even where these have been merged into a single radical in the actual Radical Index (e.g. the three sub-radicals of Radical 1).

1. Horizontal

NOTES

1. Radical Classification

The radical system used in the index to XHZD is an arbitrary one based on the leftmost, topmost or bottommost component of the character. For convenience the radicals have been numbered sequentially in the electronic index; there is no such numbering in the printed index.

In the printed index a number of radicals have been concatenated together and two different radicals given as the radical heading. In these cases the radicals have been separated and given their own radical heading (e.g. Radicals 108/109, 126/127, 235/236, 256/257, 286/287 and 318/319). In addition, a few characters which should be classified under their own radical are appended to another radical in the printed index; these have also been separated and given their own radical heading (e.g. Radicals 113, 152 and 313 which were appended to the preceding radical).

2. Index Entries

2.1 Duplicate Radicals

Radical 308 and Radical 316 appear to be identical. All the characters under Radical 316 have been moved to Radical 308. Radical 316 has been left empty, with a cross reference to Radical 308.

2.2 Duplicates Characters

There are several duplicate entries in the printed index, and one of each pair of duplicates has been removed in the electronic version.

- #0690 occurs under Radical 97 (Appendix) and Radical 321 : entry under Radical 97 removed
- #1144 occurs under Radical 19 and Radical 49 : entry under Radical 49 removed
- #1377 occurs under Radical 19 and Radical 49 : entry under Radical 49 removed
- #3465 occurs under Radical 23 and Radical 3 : entry under Radical 23 removed (#3465 under Radical 23 is an error for #3464, which is missing in the printed index)
- #4009 occurs under Radical 6 (Appendix) and Radical 128 : entry under Radical 6 removed
- #4909 occurs under Radical 293 (10-11 Strokes) and Radical 297 : entry under Radical 297 removed
- #4972 occurs under Radical 36 (9 Strokes) and Radical 36 (10 Strokes) : entry under 9 Strokes removed

2.3 Wrong Radical

A number of characters have been put under the wrong radical or not the most appropriate radical in the printed index. The following characters have been moved to different radicals in the electronic version.

- #0030 moved from Radical 315 to Radical 1
- #0246 moved from Radical 243 to Radical 166
- #0339 moved from Radical 97 (Appendix) to Radical 321
- #0362 moved from Radical 188 (Appendix) to Radical 357
- #0541 moved from Radical 90 to Radical 89
- #0632 moved from Radical 308 to Radical 172
- #0664 moved from Radical 52 (Appendix) to Radical 306
- #0694 moved from Radical 243 to Radical 166
- #0796 moved from Radical 244 to Radical 324 (9-10 Strokes)
- #1439 moved from Radical 358 to Radical 351
- #1494 moved from Radical 98 (Appendix) to Radical 352
- #1495 moved from Radical 98 (Appendix) to Radical 352
- #1648 moved from Radical 98 (Appendix) to Radical 322
- #1966 moved from Radical 23 (11 Strokes) to Radical 3 (11 Strokes)
- #2106 moved from Radical 121 (Appendix) to Radical 266
- #2293 moved from Radical 121 (Appendix) to Radical 266
- #2768 moved from Radical 121 (Appendix) to Radical 266
- #2891 moved from Radical 121 (Appendix) to Radical 266
- #3377 moved from Radical 196 to Radical 63
- #4633 moved from Radical 96 to Radical 104
- #6000 moved from Radical 73 to Radical 118 (14-15 Strokes)

In addition, the following characters don't really fit in the radical they have been assigned to in the printed index, but I have left them unchanged as there is nowhere better to put them.

- #0380 under Radical 19 (Appendix)
- #0686 under Radical 19 (Appendix)
- #0766 under Radical 19 (Appendix)
- #0990 under Radical 19 (12-17 Strokes)
- #0992 under Radical 19 (10-11 Strokes)
- #1222 under Radical 19 (Appendix)
- #1225 under Radical 19 (10-11 Strokes)
- #1308 under Radical 19 (Appendix)
- #1549 under Radical 19 (8-9 Strokes)
- #2411 under Radical 62
- #5805 under Radical 225

2.4 Missing Characters

The following characters do not appear in the printed index, and have been inserted into the electronic index under the appropriate radical.

- #0047 added to Radical 188 (9 Strokes)

- #1555 added to Radical 19 (12-17 Strokes)
- #1698 added to Radical 312
- #2390 added to Radical 236
- #2409 added to Radical 317
- #2530 added to Radical 272
- #2578 added to Radical 112
- #2591 added to Radical 201
- #2840 added to Radical 109
- #2855 added to Radical 196 (5 Strokes)
- #2856 added to Radical 196 (9 Strokes)
- #2955 added to Radical 3
- #3464 added to Radical 23 (11 Strokes)
- #5081 added to Radical 218
- #5104 added to Radical 72 (5-6 Strokes)
- #5534 added to Radical 218
- #5879 added to Radical 297

3. Columns 1 and 2

The first column shows the Tangut character using the Mojikyo [M202](#) and [M203](#) fonts. Where the Mojikyo character differs significantly from the character given in XHZD (see 3.1) or there is no corresponding Mojikyo character (see 3.2 and 3.3) the character as given in the XHZD radical Index is given in the second column using the [BabelStone Tangut Radicals](#) font. You must have these fonts installed to see the Tangut characters and radicals on this page.

The Mojikyo Tangut set comprises 6,000 characters, with a one-to-one mapping to the 6,000 characters in Li Fanwen's dictionary. However, there are a number of discrepancies between the Mojikyo Tangut set and XHZD, as detailed in the tables below.

3.1 Glyph Differences between XHZD and Mojikyo Characters

The following table lists those characters where I have noticed a **significant** difference in glyph shape between the character as written in the Radical Index to XHZD and the corresponding Mojikyo character. This list is not exhaustive, and there are certainly many more glyph differences that I have missed.

| Character | XHZD Index | Glyph | Mojikyo Glyph | Notes |
|-----------|---|-------|---|--|
| 0345 | Radical 382 with dot for last stroke on the right | 𢃔 | 𢃔 Radical 382 with horizontal stroke for last stroke | Mojikyo glyph is wrong |
| 0427 | Radical 48 | 𢃕 | 𢃕 Radical 48 with different top part | |
| 0502 | Radical 52 | 𢃖 | 𢃖 Radical 101 | |
| 0507 | Radical 52 | 𢃗 | 𢃗 Radical 101 | |
| 0987 | Radical 187 | 𢃘 | 𢃘 Radical 98 | |
| 1000 | Radical 19 | 𢃙 | 𢃙 Radical 55 | |
| 1118 | Radical 374 | 𢃚 | 𢃚 Radical 322 | |
| 1182 | Radical 49 | 𢃛 | 𢃛 Radical 19 | |
| 1267 | Radical 19 | 𢃜 | 𢃜 Radical 98 | |
| 1753 | Radical 56 | 𢃝 | 𢃝 Radical 22 | |
| 1789 | Radical 351 | 𢃞 | 𢃞 Radical 358 | |
| 2006 | Radical 25 | 𢃟 | 𢃟 Radical 3 | |
| 2028 | Radical 62 | 𢃠 | 𢃠 Radical 62 with extra stroke (same as #2411) | |
| 2200 | Radical 199 | 𢃡 | 𢃡 Radical 118 | |
| 2300 | Radical 269 | 𢃢 | 𢃢 Radical 207 | |
| 3481 | Radical 191 | 𢃣 | 𢃣 Radical 261 | |
| 3512 | Radical 191 | 𢃤 | 𢃤 Radical 157 with an extra horizontal stroke | four-corner index to XHZD has similar glyph to the Mojikyo character |
| 3514 | Radical 191 | 𢃥 | 𢃥 Radical 261 | |
| 4021 | Radical 106 | 𢃦 | 𢃦 Radical 106 without leftmost vertical stroke | |
| 4055 | Radical 45 | 𢃧 | 𢃧 Radical 46 | |
| 4624 | Radical 20 (Appendix) | 𢃨 | 𢃨 Radical 20 (Appendix) with an extra horizontal stroke | #4624 and #1134 are the same in XHZD but different in Mojikyo |
| 5146 | Radical 281 | 𢃩 | 𢃩 Radical 219 | |
| 5194 | Radical 17 | 𢃪 | 𢃪 Radical 220 | |
| 5817 | Radical 369 | 𢃫 | 𢃫 Radical 295 with a bend and hook | |
| 5880 | Radical 118 on the right | 𢃬 | 𢃬 Radical 118 with extra dot on the right | #5880 and #5881 are the same in XHZD but different in Mojikyo |

3.2 Mismappings between XHZD and Mojikyo Tangut Set

The following table lists those Mojikyo characters which have a glyph that corresponds to an unexpected XHZD number.

| Character | Mojikyo Number | XHZD Number | Notes |
|-----------|----------------|-------------|--|
| 𢃠 | 571294 | 1292 | |
| 𢃡 | 571295 | 1293 | |
| 𢃢 | 571292 | 1294 | |
| 𢃣 | 571293 | 1295 | |
| 𢃤 | 573835 | 3836 | In the XHZD index #3835 and #3836 are also misnumbered as each other. |
| 𢃥 | 573836 | 3835 | |
| 𢃦 | 573785 | 3794 | 3786, 3787, 3788, 3789 and 3790 are misnumbered as 3787, 3788, 3789, 3790 and 3786 in the XHZD index (but #3785 is correctly numbered). |
| 𢃧 | 573786 | 3785 | |
| 𢃨 | 573787 | 3786 | The result of this series of mismappings is that there are two Mojikyo glyphs for XHZD #3794 (573785 and 573794) but no Mojikyo glyph for XHZD #3790 (covered by the "BabelStone Tangut Radicals" font in the electronic index). |
| 𢃩 | 573788 | 3787 | |
| 𢃪 | 573789 | 3788 | |
| 𢃫 | 573790 | 3789 | |
| 𢃬 | 575549 | 5548 | |
| 𢃭 | 575548 | 5549 | |

In the electronic index the Mojikyo character given is the one with the correct glyph rather than the corresponding number (e.g. in the entry for #1292 the Mojikyo character used is 571294, and in the entry for #1294 the Mojikyo character used is 571292).

3.3 XHZD #6000

The most problematic entry in the index to XHZD is #6000. In the Radical Index #6000 is placed under Radical 73, and the glyph given is Radical 73 plus 7 strokes :

𢃮 (XHZD Radical Index #6000)

However, the character given for #6000 in the Four-Corner Index to XHZD, as well as the corresponding Mojikyo character ([576000](#)) is a completely different character, drawn as Radical 118 plus 14 strokes :

𢃯 (XHZD Four-Corner Index #6000 and Mojikyo 576000)

I have not yet had the opportunity to check what character the main body of the dictionary has for #6000, but I am assuming that the Radical 118 character (Mojikyo 576000) is the real #6000. Accordingly, I have moved the character given in the Four-Corner Index as #6000 (Mojikyo 576000) to Radical 118 and assigned it the number "6000", and left the character given as #6000 in the Radical Index under Radical 73, but with no number or reading (based on #3232 it would seem that the reading given in the Radical Index for #6000 goes with the Radical 118 character). As there is no Mojikyo character for the character with no number under Radical 73, it is covered by the "BabelStone Tangut Radicals" font.

4. Column 3

The third column gives the phonetic reconstruction of the character as given in the index to Li Fanwen's dictionary. These readings are based on the reconstructions of Gong Huangcheng 龚煌城.

As these reconstructions use a complex mixture of special letters and diacritic marks there is ample scope for transcription and typesetting errors, and a great many of the reconstructions in the index to XHZD do indeed appear to have such errors. I have checked every single reading against the rhyme class (Column 3) and the initial class (Column 4), and where a discrepancy between the values of these classes and the provided phonetic reconstruction suggests a transcription or typesetting error I have silently corrected the phonetic reconstruction. There are several hundred such corrections. In addition, the phonetic reconstructions and phonetic classes given for 3131, 3132, 3133, 3134 and 3135 in the printed index are actually for 3132, 3133, 3134, 3135 and 3131 respectively.

I have also collated my corrected phonetic reconstructions with Gong Huangcheng's phonetic reconstructions as given by [Guillaume Jacques](#) in his [龚煌城西夏文拟音](#). Where my corrected phonetic reconstructions differ from the phonetic reconstructions given by Guillaume Jacques, his reading (modified to use the same orthography as the XHZD index) is appended in square brackets.

5. Column 4

The fourth column gives the Rhyme Class as given in the index to Li Fanwen's dictionary. Where there is a discrepancy between the rhyme class given in the index and the phonetic reconstruction which appears to be due to an error in the rhyme class numbers (e.g. **2.41** is given where **2.14** would be expected from the phonetic reconstruction) the rhyme class has been silently corrected.

The corrected rhyme classes have also been collated against the rhyme classes given in Li Fanwen's *Tongyin Yanjiu* 同音研究 [TYYJ] (Ningxia Renmin Chubanshe, 1986), and where there is a discrepancy the rhyme class given in TYYJ have been appended in square brackets. In about half of the cases where there is a discrepancy, the rhyme class differs by tone only (e.g. XHZD has **2.14** where TYYJ has **1.17**).

6. Column 5

The fifth column gives the Initial Class of the character as given in TYYJ. I have not yet checked these against the actual initial classes given in XHZD.

7. Column 6

The sixth column gives the Sequence Number of the character in to Li Fanwen's dictionary. In the following cases the number given in the printed index is incorrect :

- p.1094 col.2 #3835 is a mistake for #3836
- p.1094 col.2 #3836 is a mistake for #3835
- p.1100 col.2 #3034 is a mistake for #3024 (the glyph is for #3024 but the reading is for #3034)
- p.1111 col.3 #3000 is a mistake for #3090
- p.1103 col.1 #4772 is a mistake for #4768
- p.1103 col.2 #4773 is a mistake for #4769
- p.1111 col.2 #3786 is a mistake for #3790
- p.1128 col.2 #3787 is a mistake for #3786
- p.1129 col.2 #3788 is a mistake for #3787
- p.1130 col.1 #3789 is a mistake for #3788
- p.1131 col.2 #3790 is a mistake for #3789
- p.1138 col.1 #5634 is a mistake for #5684
- p.1138 col.2 #5880 is a mistake for #5881
- p.1138 col.2 #5881 is a mistake for #5880
- p.1148 col.3 #3435 is a mistake for #3436
- p.1148 col.3 #3436 is a mistake for #3435
- p.1153 col.2 #5684 is a mistake for #5648
- p.1155 col.2 #0604 is a mistake for #0605
- p.1160 col.1 #4750 is a mistake for #4705
- p.1160 col.3 #5888 is a mistake for #5890 (or possibly p.1154 col.2 #5888 is a mistake for #5890, in which case Mojikyo #575888 and #575890 would be swapped)

8. Duplicate Characters

The table below lists those pairs of characters that appear to share the same glyph shape. This list only covers those examples of duplicate characters that I have happened to notice, and so is probably not exhaustive.

| Number | Character | Reading | Notes |
|--------|-----------|---------|-------|
| 0042 | 𢃠 | khji | |
| 4537 | 𢃠 | | |
| 0184 | 𢃡 | twa | |
| 4510 | 𢃡 | | |
| 0406 | 𢃢 | dji | |
| 0407 | 𢃢 | djwu | |

In addition to the above pairs of characters with identical glyph shapes, there are many pairs of characters which only have a very subtle difference in glyph shape. These glyph differences are sometimes only noticeable in the Mojikyo font, and may not be discernible in the corresponding glyph used in the index to XHZD. A very few of the many examples of subtle glyph differences are shown below :

- 0184 疏 and 1919 疏
- 0514 脩 and 2388 脩
- 0515 脩 and 2390 脩
- 1039 檻 and 2943 檻
- 1131 檻 and 2985 檻
- 1134 緣 and 2988 緣
- 1972 縱 and 4544 縱
- 2572 縱 and 0671 縱
- 4554 屛 and 1984 屛
